ABSTRACT

Avoteo, first of all, is “a vote”. The vision is to create and provide a platform that connects the best elements of four different exciting areas. A voting method that changes the game for startups and entrepreneurs.

Have you always had a great idea, but never got it off the ground to get started because banks or other investors could not see the potential of your project?

Avoteo provides you with a platform to reach thousands of potential investors. The best part is, they don't give you their money—they give you their voice.

Present your idea, convince our community, gather likes, and become one of the most-voted projects. Make it to the top, and we will fund your project out of our funding pool.

INTRODUCTION

We live in a digitalized world. Each day, we make an impact with a simple click of a mouse or a tap on a screen.

Augmenting our physical world, we build online networks and we interact with people from all over the globe. We share our opinions and visions with everyone who is willing to listen.

We make friends, discuss movies or the news, and play video games online with people we may never meet in person. We are able to create whole online communities based on shared interests, opinions, goals and dreams. We decide what is good and what is bad using the power of numbers, like and dislike buttons, and other rating systems. Online voting represents democracy in its purest form: no secret meetings behind closed doors, no personal gains and competing interests - simply the power of the people giving directions.

A few decades ago, the dream was to find a steady job and work there for the rest of your life, but today's generations want to do things differently. Next to making money to live, they want to enjoy their occupation; working at the same job, is not usually seen as an appealing future. Few still dream of working for a boss until they are too old to really enjoy their lives to the fullest. There is a whole movement that aims to become financially independent and retire early (https://en.wikipedia.org/wiki/FIRE_movement). Many find better ways to make a living: some start their own companies, some become skilled traders on the crypto or stock markets, and others simply make videos that other people like to watch. There are countless examples of how creativity, combined with the advantages offered by the digital world led to great success.

One could argue that our financial system is broken. We cope with negative interest rates (unless you're the one borrowing the money), inflation, and wealth gaps that depend on where you were born. The public's increasing interest in stock trading and cryptocurrencies is no surprise.

Our team does not believe in the old-fashioned financial system, where only the rich can have the means to pursue their goals. We don't believe in a system where grey suits get to decide which ideas are good and deserve a chance to make it, and which ideas are tossed into the trash bin. We believe that a diverse community consisting of many unique minds, with different backgrounds and different experiences and expertise, is much more suited to make such decisions.

Times have changed, interaction has changed, and many dreams have changed. Avoteo aims to make a large impact on the world and on the lives of everyone involved in the project. We aim to build a community where creative people with good ideas get the chance to receive funding to make their ideas a reality. It will be the community that decides which ideas are worth pursuing, and that same community will also reap the rewards if the ideas succeed. Avoteo is set to create an ecosystem where everyone benefits from everyone. We will not only help to fund the best ideas, but we also aim to create a community of people with diverse experiences that can help to make those ideas and dreams a reality. Each Avoteo-funded project that succeeds will be a win for the whole community. Avoteo is here to make dreams come true.

GOAL AND VISION

Avoteo is set to revolutionize crowdfunding, combining the best elements of the four different sectors.

We will create a revolutionary community platform that aims to collect ideas and generate the funds to bring those ideas to life. We will rely on the power of the community to judge which project ideas are most likely to succeed.

Along with these primary goals, we will also facilitate making use of each other's skills and experience to transform concepts into reality. We want to be a place where ideas can be discussed freely and where dreams can become reality.

We, developed a system that, with time, will become self-sustaining, as the revenues generated by projects that become successful will flow back to the community and the Avoteo ecosystem. Success stories will generate more funding, which will generate more success stories, a cycle that will benefit the entire community.

Avoteo strives to be a community-governed project, meaning that your votes will not only decide which projects receive funding but also how the platform itself will develop. The next revolution in crowdfunding is here!

AVOTEO PLATFORM

Several, crowdfunding platforms have the same goal: to give new ideas a chance.

Why do we need another platform? Why does the world need Avoteo?

The answer is quite simple:

Avoteo is entertaining, is free of charge, brings you financial benefits while it costing you nothing.

Benefits to funding competition participants

On the platform, any Avoteo, holder can present their ideas, through articles, videos, posters, or any way the creator chooses. The only requirement will be holding a specified number of Avoteo tokens. However, it will be possible to give a project more exposure by booking special promotion packages. That doesn't mean that the paid ideas will win the competition. Here creativity is required, just like on social media platforms. The key is to be seen. Each project will have its own space within the Avoteo platform, where the creators can discuss their ideas with the community and answer questions. There are nearly no limits. You can promote any kind of business you have in mind, whether it's real estate, entertainment, technology, cryptospace, art, or more.

Avoteo will grow with the ideas of its community.

Benefits to the voting community

The role of AVO token holders that have no specific interest in starting their own project will be to review all the content and vote. Being critical in voting is essential; the number of votes will be limited and all community members are responsible for the quality of the projects that win the competition. The better the quality, the higher the success rate, and the higher the success rate, the more the whole community will profit. Having voted for a winning project will result in additional benefits when the project succeeds.

Holding AVO token, gives you several benefits:

- Follow your favorite founder and support the project by upvoting it
- Take part in governance voting on company's strategy
- Simply keep the tokens in your wallet and take advantage of the redistribution
- Gain passive income from the profit share of the funded projects
- Trade your AVO token on several DEX and CEX, once listed
- Read our Medium article below to learn more about benefits of holding the AVO token:

<https://medium.com/@avoteo.io/update-on-the-mechanics-behind-avoteo-52f206629382>

Voting system

The voting system is crucial. Users can vote by giving upvotes or downvotes to projects. Each wallet holding the minimum required amount of AVO tokens is entitled to one vote per project.

Governance

Avoteo will be built around its community. Voting will not only be important to rate the different projects, but it will also be used to decide the direction of the project. On top of governance voting organized by the developers at important crossroads, it will also be possible for the community to suggest governance votes. If a proposed vote is supported by two-thirds of the community members and reaches a predefined minimum number of votes, it will be held as an official governance vote and the outcomes will be respected by the developers.

Skill marketplace

As a community-driven project we also want to bring people together. Some community members may not have specific ideas for a project, but they may have specific skills.

Another of Avoteo's goals is to bring the people with ideas and the people with the required skills to make those ideas a reality together. There will be a dedicated space where people with specific skills can advertise their abilities, or where other members in need of someone with certain skills can advertise to look for them. Perhaps you have a great idea for a new addictive mobile game, but you don't know how to build a mobile app, while someone else from the community has the skills to build apps but lacks the million-dollar idea. Using this feature, community members can start working together to come up with better and more realistic project proposals, which, in turn, Avoteo can help to fund. If both parties agree to use the AVO token as method of payment we will facilitate an escrow service, ensuring that you will get what you pay for. Additionally, voting will also be a crucial part of the skill marketplace, that way you can choose to work only with the best.

AVOTEO HOLDINGS

We will found a legal entity known as Avoteo Holdings. As compensation for being funded, the winners of the funding competition will attribute a certain amount of their profits (depending on the total amount funded) to Avoteo Holdings. The income of Avoteo Holdings will then again be shared with the Avoteo community and contribute to the funding wallet through the purchase of tokens on the open market. The only requirement for AVO token holders to share in these gains is to hold AVO tokens on the platform without moving them for a period of 12 months. After those 12 months, and depending on the number of tokens that have been held for that period, each community member will receive a share of the income from Avoteo Holdings. This share will be distributed in AVO tokens that will be bought at the open market. In other words: if the funded projects succeed, Avoteo Holdings will start generating revenue and the community will profit more. A part of the profits from Avoteo holdings will also flow back into the funding wallet to help accelerate the growth of the number of Avoteo-funded projects.

AVO TOKEN

The AVO token will be made available on the Binance Smart Chain. The max supply will be 1,000,000,000; however, the circulating supply will decrease over time through manual burns if the community votes to do so. Compared to many other projects in, crypto space, the AVO token will have several use cases.

With our Avoteo platform, built to be used in connection with the AVO token only, we will bring together AVO holders and users, as well as entrepreneurs, all around the globe, giving them all the advantages of being part of our ecosystem.

Token distribution

The 1,000,000,000 AVO tokens will be distributed as follows:

300,000,000 will be distributed to the team, partners, and advisors. Those tokens will have a vesting period of 12 months after the first listing on DEX and will be released in the transaction of a 5% offer the following 12 months.

150,000,000 will be used for referrals.

50,000,000 will be used for giveaways. These could be, for example, airdrops, rewards for social competitions, or as staking rewards. In each case, these tokens flow back to the Avoteo community.

500,000,000 tokens will be sold during three rounds of ICO

ROUND 1

Private Sale: the tokens will be sold for the equivalent of \$0.01. The funds will be used for the developing the platform, founding Avoteo Holdings, and hiring employees.

The tokens will have a vesting period of 9 months after the first listing after which 50% will be unlocked. 3 months later, the remaining 50% will be unlocked.

ROUND 2

Presale Phase 1: the tokens will be sold for the equivalent of \$0.02.

There will be a minimum purchase of 5,000 AVO tokens, and a maximum purchase of 1,000,000 AVO tokens.

The tokens will have vesting periods: 25% of the tokens will be unlocked directly upon listing, 25% will be unlocked 3 months after listing, 25% will be unlocked 6 months after listing and 25% will be unlocked 9 months after listing.

ROUND 3

Presale Phase 2: in this crowd sale phase, the tokens will be sold for the equivalent of \$0.05. The funds will be used for developing the platform, founding Avoteo Holdings, and hiring employees.

Unsold tokens from one round will be transferred to the next, and all unsold tokens after round three will be burned. Upon listing, the liquidity will be locked for a period of two years; the exception is when a governance vote by the community decides that tokens need to be unlocked, for example, to burn some of the tokens, redistribute among the community, or to facilitate further development of the Avoteo ecosystem.

Tokenomics

There will be a 10% tax on every transaction. This tax will be distributed as following:

Funding wallet

A part of Avoteo is the funding wallet. We will fund projects using this wallet, which means that there is no need for our community to invest their own money, other than in buying their tokens. This aspect sets us apart from other crowdfunding platforms that require you to directly invest money into the funded projects. A financial goal will be specified, and once that goal is reached, the funding wallet will be used to fund the best projects, as decided by the community. After the goal is reached, we will set the next financial goal for the funding wallet, which will then be used to fund additional projects. Here, the community will have a voice, and Avoteo will consider it in the decision.

ROADMAP

Avoteo is growing and changing every day. Below, we provide a roadmap; it is not set in stone, and can change and be adjusted for the platform's benefit. However, we are determined to follow the steps provided in the roadmap as closely as possible. If adjustment is required, we will communicate this to our community through our social media channels.

September 2021

- Website released, whitepaper finalized

October 2021

- Private sale launched, social media accounts kicked off, marketing campaign started

December 2021

- Presale phase 1 launched, Avoteo platform development started, team doxed

Q1 2022

- Presale phase 2 launched

Q2 2022

- Change to: Token listed on DEX, beta version of Avoteo platform released, private sale/crowdsale investors onboarded

Q3 2022

- Avoteo platform opened to public, token listed on CEX

Q4 2022

- First Avoteo projects funded, massive marketing campaign launched
